***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to a resin mortar composition.

Group II, claims 8-11, drawn to method of using claims.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while it is recognized that there is a technical relationship between the Groups set forth above (i.e., the resin mortar composition), it is the examiner's position that this technical relationship does not amount to a special technical feature because the resin mortar composition fails to define a contribution over the prior art. Specifically, WO 01/92180 discloses a resin mortar composition comprising curable organic liquid phase resin, glass beads, glass powder, and glass fiber (abstract) and teaches that the amount of each is to effect filling up voids between glass beads (page 4). Given these teachings, it would have been obvious to one of ordinary skill in the art to utilize suitable amounts of each ingredient to obtain a composition that can effectively be a resin mortar. Evidence to support the examiner's position is found in JP 09-110501 which discloses a resin mortar composition and teaches that the amounts of filler should be on the same order of magnitude as presently claimed.

Art Unit: 1796

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

6. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
